NxtWall by Starwall USA

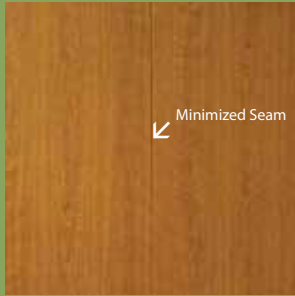

NxtWall anticipates change.

Today's work spaces require incredible flexibility! New challenges are presented to facility managers, developers, and building owners to provide agile and affordable spaces that can meet the fast changing needs of today. **NxtWall** will divide these spaces and provide new meaning to speed, flexibility, sustainability, aesthetics and most importantly - **affordability**.

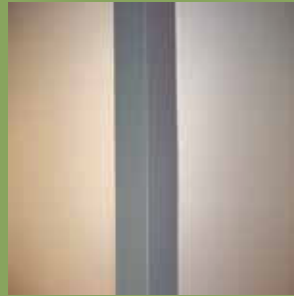

The demands for more flexible and sustainable buildings with improved construction methods have created a demand for a "new generation" of demountable walls. The rigidity and waste of conventional construction and earlier generations of "unitized" movable wall panels, no longer support the realities of today. The time has come for **NxtWall**, which will affect change like none other.

INTEGRATION

WALL SEAM

INTEGRATED CORNER

NxtWall, a new generation of demountable architectural walls, provides a more flexible "Modular Field Assembly", that anticipates changing building conditions.

NxtWall's agile architectural wall lends itself to future use and reuse needs of today's businesses.

CEILING INTERFACE

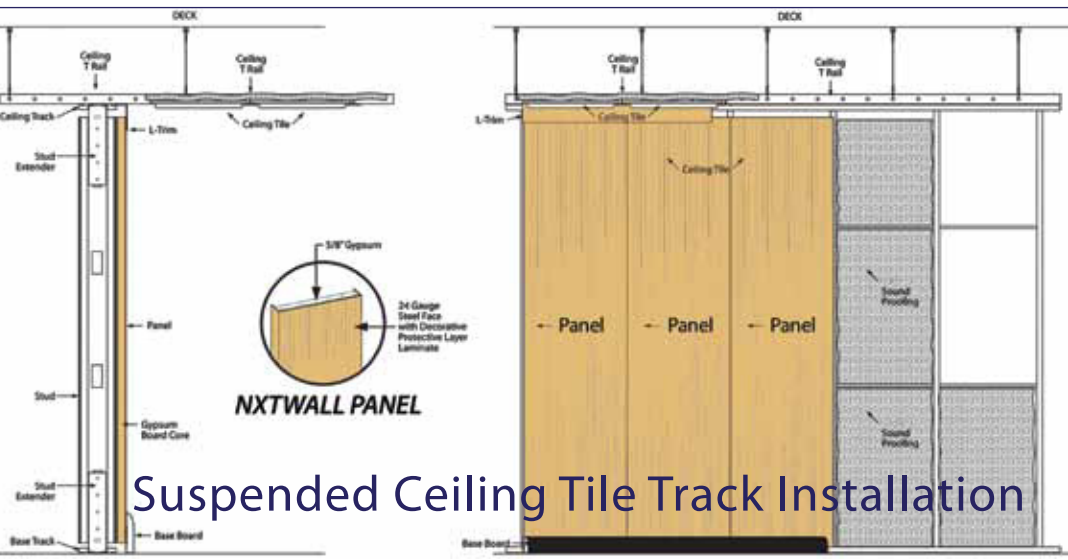

FLOOR INTERFACE

CABLE MANAGEMENT*

NxtWall allows easy access to interior of walls for data and electrical maintenance.

* Power option also available at the base of walls

Suspended Ceiling Tile Track Installation

NxtWall's refined panel-to-panel reveal replaces conventional drywall and provides an attractive sidewall to Starwall's Classic and Finesse architectural walls.

The 5" thick walls provide outstanding acoustics (STC 50*) as well as fire rated walls as options.

NxtWall's minimal kit of parts and "Modular Field Assembly" provides a quick and easy installation.

* STC ratings may vary based upon wall configuration, wall, ceiling and floor treatment, and wall material

Applications

NxtWall Series demountable walls offer flexibility, durability and virtually seamless space division for nearly limitless applications. **NxtWall** together with Starwall's Classic and Finesse lines, create a comprehensive solution that is unmatched. A total system that saves you money!

Savvy facility professionals tired of the expenses and endless drywall dust have found the benefits creating building division, break rooms, conference rooms, shared common walls and more...

Real estate investment professionals have found the benefits of investing in a solution that gets their tenant into their space more quickly with impressive flexibility to deal with the changing business landscape.

Healthcare delivery professionals appreciate the acoustical benefits while enjoying the warmth of the spaces they can create.

NxtWall is ideally suited for:

- Office partitioning walls
- Shared common walls integrated with our Classic & Finesse series architectural walls
- Tenant spaces
- Healthcare delivery applications
- Executive conferencing spaces
- Laboratory and technical walls

Supports Reusable and Sustainable Product Design

Manufacturing of any kind places burden on the environment. Environmental responsibility begins with a product's ability to support significant change and reuse. Keeping this in mind, NxtWall leads the way in product reuse and supports sustainable building design.
